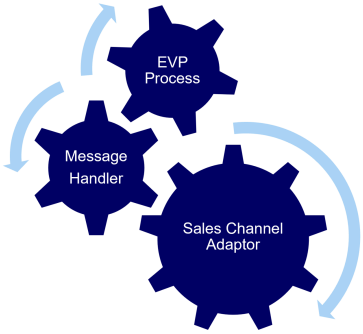
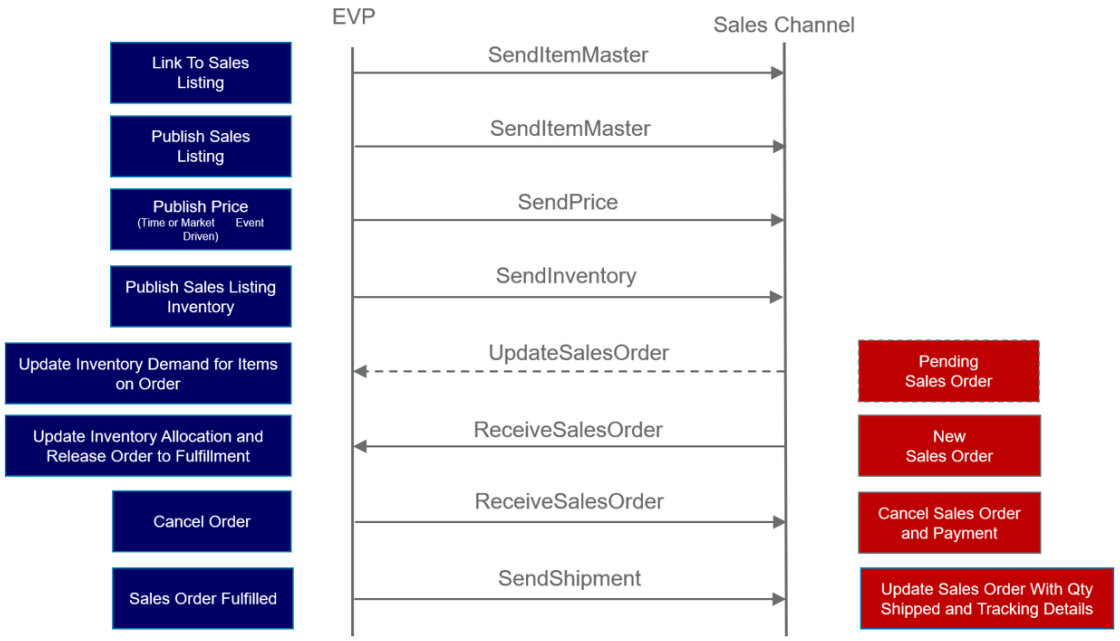
CBA-CT-SALC: Sales Channels Capability Summary for 3PLs

Process Scope and Configuration	Etail Vantage Platform → Channel Based Architecture (CBA) → Sales Channel (CBA-CT-SALC)
Activity Description	A Sales Channel adaptor is used to support publishing or linking to a sales channel listing and then publishing inventory and price based on the current available inventory its location and estimated shipping cost. Once an order is placed, it will need to be fulfilled at the best cost based on the service level associated with the sales order.

Level 4 – Workflow





Level 4 – Requirements Summary

See the 'Sales Channel Model' section of the EVP Capabilities Ref. Guide (link) for details of the integration support with the above channel type. It is assumed that Driver Mods will use all or a sub-set the standard touchpoints supported by these sales channel adaptors. If any extension to standard capabilities are needed they will be document as Level 5 Extensions.

Level 4 – EVP Functions Associated with the Activity

The following sales channels need to be implemented to support Driver Mods requirements ✅ = Standard Capability - To Be Use, ❌ = Standard Capability - No plan to use ❓ Standard Capabity - Usage TBD

🚫 = Not a support capability and 💎 Advanced Feature (IIP Change Order Requried) or Future Phase (SOW Required)
