

CBA-CT-SALC: Sales Channels Capability Summary for Brands

Process Scope and Configuration	<div>Etail Vantage Platform</div> <div>Channel Based Architecture (CBA)</div>
Activity Description	A Sales Channel adaptor is used to support publishing or linking to a sales channel. The adaptor is used to support publishing inventory and price based on the current available inventory and shipping cost. Once an order is placed, it will need to be fulfilled at the level associated with the sales order.

Level 4 – Workflow
